LETTER OF TRANSMITTAL.

THE PANAMA CANAL, CANAL ZONE,
DEPARTMENT OF HEALTH,
Balboa Heights, Canal Zone, November 11, 1914.

Col. GEORGE W. GEOTHALS,
*Governor of the Panama Canal,
Balboa Heights, Canal Zone.*

SIR: I have the honor to submit the following report of the operations of the department of health for the month of October, 1914.

Very respectfully,

CHAS. F. MASON,
Chief Health Officer.

GENERAL REMARKS.

No cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month.

Since the last report the following new or amended sanitary ordinances for the cities of Panama and Colon have become effective:

(1) Providing for the service of notices for the removal of nuisances and unsanitary or unsafe structures, by posting.

(2) Forbidding the establishment or maintenance of private hospitals.

(3) Providing for the more effective rat proofing of stables.

The following new or amended sanitary ordinances have been approved and will go into effect on November 15, 1914, except No. 9, which will be effective January 1, 1915:

(4) Providing for the more effective collection and protection of garbage.

(5) Providing for the proper maintenance of sidewalks, areas, and yards.

(6) Providing for proper reporting and registration of contagious and infectious diseases.

(7) Providing for the protection of fowls and animals and their food from rats.

(8) Providing for the more effective rat proofing of buildings.

(9) Providing for proper reporting and registration of births and deaths.

Ordinance No. 1 provides a more expeditious method of serving notices than that formerly employed. No. 2 is intended to keep the control of hospital activities directly under the department in

order to better safeguard the public interests against the introduction and spread of infectious diseases. Nos. 3, 4, 7, and 8 are for the prevention of the spread of plague should it be introduced. No. 5 is of general application, while Nos. 6 and 9 provide for the proper registration of vital statistics and are based upon the model laws.

During the month the preparation of smallpox vaccine virus by the Board of Health Laboratory, on the 1st inst., has been commenced. In a short time the department will be able to furnish all the vaccine that is needed, in a fresh and reliable condition, and at a decidedly reduced expense.

VITAL STATISTICS.

EMPLOYEES.

The health of the employees was better than for any previous month. The number of names on the rolls for the preceding month was 38,416.

The total number of admissions to hospitals and quarters was 1,102, a rate of 344.23 per thousand, as compared with 365.70 for the preceding month and 492.80 for the corresponding month of last year.

The total number of deaths from all causes was 23. Of these, 15 died from disease, or 4.68 per thousand, as compared with 5.31 for the preceding month, and 5.14 for the corresponding month of last year. The diseases causing the largest number of deaths were as follows: Lobar pneumonia, 5; malarial fever, estivo-autumnal, 2; organic disease of heart, 2; tuberculosis, 3. No other disease caused more than 1 death.

The constantly noneffective rate was 11.18, compared with 10.97 for the preceding month and 14.58 for the corresponding month of last year.

The total admission rate for malaria, hospitals and quarters, was 76.22, compared with 77.39 for last month, and the total noneffective rate 1.36, compared with 1.43 for last month; each of these rates was lower than for the same month last year.

The diseases next to malaria causing the highest admission rates, in the order of their numerical importance, were venereal diseases, diseases of the digestive, nervous, and respiratory systems. These five classes of diseases caused 54 per cent of all admissions to hospitals.

There was one admission for typhoid fever, giving a rate of 0.31 per thousand, compared with 0.59 for last month and 0.62 for the corresponding period of last year.

EFFECTS OF RACE.

The admission rate to hospitals and death rate for disease for black employees were 135.40 and 5.34 per thousand, as compared with 355.03 and 1.87 for white employees. The noneffective rate for disease and injuries for black employees per thousand was 9.65, as compared with 18.74 for white employees.

The admission rate to hospitals and quarters for malaria was 58.51 per thousand for blacks, as compared with 164.43 for whites.

The death rate for Americans was 2.29, as compared with 10.11 for Europeans. The admission rate to hospitals for disease for the latter was 626.79, compared with 293.41 for Americans. The admission rate for malaria to hospitals and quarters was also much higher among the Europeans, being 343.71, as compared with 123.78 for Americans.

DEPORTATIONS.

There were 19 deportations accomplished during the month, 10 employees and 9 nonemployees; for disease, 15, and for injury, 4.

CANAL ZONE.

Among the 36,395 residents of the Canal Zone there were a total of 49 deaths; of these, 42 deaths were from disease, giving a rate of 13.85 per thousand, as compared with 13.11 for the preceding month and 15.91 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 45, compared with 29 last month.

There were 46 births reported, giving a rate of 15.17 per thousand. Of these births 10 were of white and 36 of colored children. There were no deaths of white and 15 deaths of colored children under 1 year of age, giving an infant mortality per thousand of 417 for colored children, with a general average of 326.

PANAMA CITY.

The population of the city is 60,000, among whom there were a total of 163 deaths; of these 160 deaths were from disease, giving a rate of 32 per thousand, as compared with 32 for the preceding month and 32.56 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 47, compared with 50 last month. The principal causes of death showing an increase as compared with September were: Dysentery 9, compared with 3 last month; pellagra 5, compared with 3 last month; and nephritis 15, against 12 for the preceding month.

There were 256 births reported, giving a rate of 51.20 per thousand. The infant mortality was 203 per thousand.

The outbreak of beriberi reported last month is subsiding, only 2 new cases were reported in October. Careful investigation has revealed nothing of special interest; the factors common to all cases were improper diet and bad sanitary surroundings.

COLON.

The population of the city is 29,331, among whom there were 51 deaths; of these 49 were from disease, giving a rate of 20.05 per thousand, as compared with 27 for the preceding month and 23.14 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 39, compared with 47 last month.

The principal causes of death showing an increase as compared with September were: Pellagra 2, compared with 0 for September; organic disease of heart 4, compared with 3 last month.

There were 156 births reported, giving a rate of 63.82 per thousand. The infant mortality was 109 per thousand.

HOSPITAL DIVISION.

ANCON HOSPITAL.

During the month the average number of patients constantly in hospital was 511. The per capita cost of patients in hospital proper was \$1.895 gross and \$1.052 net. The per capita cost of patients in the insane asylum was \$0.51.

BOARD OF HEALTH LABORATORY.

The following work in addition to the usual routine was done:

The preparation of smallpox vaccine for local use by the health department was begun during the month. It is proposed to prepare about 3,000 points of glycerinated vaccine per month.

The examinations of placental and peripheral blood with relation to the diagnoses of malaria, are being continued. Data are being collected on the incidence of malignant and benign neoplasms among the white, mestizo, and negro employees.

Data are being collected to show the marked diminution in the number and grade of hookworm infections noted during the past few years among the laborers employed on the canal, as a result of the improved hygienic and sanitary conditions under which they live.

Considerable time has been spent in collecting and preparing material and data for the exhibits at Panama and San Francisco.

FARM FOR DISABLED.

The per capita cost was \$0.42, as compared with \$0.30 in September. Grading of road and site for cow barn was continued during the month. In addition to this, fencing of hog lots, repairing pasture fence, and cultivating garden and nursery were done.

INSANE DEPARTMENT.

Twenty patients were admitted for mental observation during October, none of whom had been in the institution previously. Seven of the total admissions were whites of several nationalities.

Ten male patients were deported—to Grenada, 2; Guadeloupe, 1; Portugal, 1; St. Lucia, 2; Trinidad, 1; and St. Vincent, 3.

The improvised quarters for the insane at Orozal, made necessary by the reversion of the prison stockade to the division of police and fire, were ready for occupation on the 2d instant, and 30 patients were returned to the hospital farm on that date. These have recently been furnished employment in excavating for the cow barn and piggery to be erected at that place.

The sewing room with its staff of seamstresses, formerly attached to the Ancon Hospital storehouse, has been transferred permanently to the asylum, in order to provide further occupational diversion for the inmates among the females. In addition to the making of sheets, pillowcases, aprons, etc., for the hospital, the repairing for the laundry at Ancon will be continued as heretofore. A commodious building has been set aside as a sewing room, with facilities for the storing of stock materials to be used during the ensuing year.

The general health of the population continues excellent.

CHRONIC WARD.

There were 28.16 chronic and incurable patients constantly cared for during the month.

Detailed statistics are shown in Table XIII.

COLON HOSPITAL.

The highest number of patients treated on any one day during the month was 52, the lowest number 24, the daily average being 41.50. The average number of employees constantly sick was 30.22; the average number of day's treatment per employee was 8.54.

Detailed statistics are shown in Table XIV.

PALO SECO LEPRO ASYLUM.

The number of patients under treatment at the end of the month was 50, a decrease of 1 over the previous month. The per capita cost per patient was \$0.90.

Detailed statistics are shown in Table XV.

SANTO TOMAS HOSPITAL.

The number of patients constantly sick in hospital has shown a progressive increase over the previous month and is larger than at any other period of the history of the hospital. During this month a total of 1,581 patients were treated, an increase of 153 over the previous month. The daily average of patients reached 452, an increase of 19 over September, while the number of hospital days reached 14,019 as compared with 12,991 for the previous month.

The number of deaths in hospital was 81 for the month, of whom 9 gave Colon as their residence. The number of births was 95, of which number 14 were stillborn.

During the month there has been a decrease in the number of cases of beriberi treated, but admissions for this cause are being constantly made and many of these patients give Panama as their residence. Malaria is increasing, and the estivo-autumnal type is the prevailing type of infection, outnumbering the other types about 5 to 1.

Detailed statistics are shown in Table XVI.

DISTRICT DISPENSARIES.

The dispensary having the highest admission rate for malaria was Ancon, with an average weekly percentage of 0.26; that having the lowest was Paraiso, with a percentage of 0.06.

Detailed statistics are shown in Table IX.

SANITATION.

CANAL ZONE.

The malaria rate remains lower than in any previous year, and it is thought that some progress is now being made in getting malarial cases to continue treatment after their discharge from hospital.

There was a fairly general increase in the *Anopheles* catch during the month, accounted for by the abundance of rain.

The antimosquito work on the hydraulic fill back of Ancon and that back of San Miguel district of Panama has been continued with satisfactory results.

General sanitary conditions have been excellent, as shown by the practical absence of diseases other than malaria that can be traced directly to sanitary faults. Measles and mumps have spread somewhat, though less it is thought than would have been the case in the United States had they been introduced into schools and barracks.

The physical examination of food handlers and bacteriological examination of their stools is being extended.

The use of larvacide has been cut to less than 10 per cent of the former figure without harm and with a considerable saving of money. The use of crude oil has also been considerably reduced in some districts, and with satisfactory results.

The following communicable diseases were reported during the month:

Measles.....	2	Tuberculosis (of any organ).....	2
Mumps.....	4	Infectious diseases of the eye.....	1
Marial fever.....	249	Erysipelas.....	1
Tetanus.....	1	Whooping cough.....	15

Detailed statistics are shown in Table XVII.

PANAMA.

The following communicable diseases were reported during the month:

Typhoid fever.....	2	Diphtheria (croup).....	3
Mumps.....	3	Beriberi.....	2

The three cases of diphtheria reported proved to be of a very mild character.

The rate for malaria continues rather high, especially from that section of the city known as Calidonia-Guachapali. The large number of people chronically infected who have recently moved into the city from the condemned settlements of Trujillo and Pena Prieta doubtless is an important factor in the situation. It has been the custom with some of the local physicians to state the cause of death as "malaria" in moribund infants presenting high temperatures and large spleens, but not confirmed by the microscope. It is probable that very few of these cases are really malaria.

VACCINATIONS.

The total number of vaccinations since April 1 is 10,923, only 1,444 being performed for the month, due to the lack of supply of points. No infected arms have yet been reported to the office.

MOSQUITO, RAT, AND FLY WORK.

Mosquitoes.—With the heavier rains incident to this season there is an increase in the number of mosquito-breeding places found. Several large areas in which *Anopheles* were breeding have been abolished by adequate ditching. Special attention was given toward eliminating any breeding adjacent to the exposition grounds on the south side of Calidonia Road and that area lying

on the north side of the road close to the public wash house, where *Anopheles* were found in great numbers. Considerable grass cutting on the part of the owners of vacant lots throughout the city was instituted and is helpful.

Flies.—The public dump continues to be the largest fly-breeding area in the city and we have been able to catch them as fast as they are bred, 218 quarts being taken for the month. Three hundred and eighty-four deposits of fly larva were found and destroyed. With the heavy rains there has been a reduction in the fly-breeding places and an increase in the mosquito-breeding places, which is to be expected.

Rats.—Of the 608 rats trapped during the month throughout various sections of the city, chiefly along the water front, all of which were examined at the laboratory for plague, none were infected.

PURE-FOOD INSPECTIONS.

The public milk supply is examined monthly with very satisfactory results.

Scoring of hotels, bakeries, bottling works, and dairies still creates a certain amount of competitive enthusiasm in owners, and the condition of these establishments generally is good.

GARBAGE COLLECTION.

The collection and disposition of garbage for the month was carried on with success, the garbage being taken once a day in all parts of the city, except in the more congested districts, where it is found necessary to make two collections each day. A large number of self-closing wooden covers for garbage cans were installed during the month. These covers are especially useful in the tenement house, where protection of food refuse against flies and rats is not given very serious consideration by the occupants. The entire district of Chorillo is supplied with cans and covers, and the same work in the Calidonia-Guachapali district is being pushed to completion.

STREET CLEANING.

The daily cleaning of streets for the city has been efficiently prosecuted, with the combined method of machine and hand brooms. A slight cost reduction has been effected over that of the preceding month.

BUILDINGS.

Since the work was begun in April last, 1,034 permits have been issued to date, of which 70 per cent are found to be completed. It is noted that of this number 213 of the permits were for new buildings, whereas 821 were for repairing and rat-proofing old buildings. Of the 186 buildings demolished since April, the great majority of these were in such a wretched condition as to be uninhabitable, particularly along the beach, where the "squatter type" of buildings were encountered. It was found that in nearly every such establishment *Stegomyia* breeding had been occurring, owing to their water supply being taken from some vender and stored in unscreened jars or barrels. The demolishing of these settlements removes a serious menace to public health.

Detailed statistics are shown in Table XVII.

COLON.

The consolidation of the work of garbage collection and grass cutting in the cities of Cristobal and Colon was effected October 19. These features of the sanitation of Cristobal were previously done by the supply department.

The construction of the sea wall at Folks River is progressing rapidly, and will be a great sanitary improvement to the city when completed.

Investigation of the mosquito-breeding areas in the Mount Hope district has been made through the board of health laboratory, and it has been observed that the breeding areas of the malaria mosquito have been reduced to a noticeable extent, through depopulation of the district. The practical result of this observation will be less expense to the department and a reduction of the malaria rate.

The health conditions of all the dredges in the Atlantic division have been improved since the inspection of the previous month.

Thirty-seven houses on Guava Ridge were destroyed by fire as a result of their condemnation for sanitary reasons and failure on the part of the owners to demolish same.

The anti-rat campaign has been maintained by trapping and poisoning, and there has been a noticeable reduction in the number of rats found on the docks and along the water front.

The following cases of communicable diseases were reported during the month:

Measles.....	17	Mumps	5
Typhoid fever.....	1	Diphtheria (croup)	1

The number of people examined for vaccination was 1,208. Of these, 973 were found protected and 235 were vaccinated.

Detailed statistics are shown in Table XVII.

QUARANTINE SERVICE.

The plague situation in South America shows a slight change, with the new case reported at Rio de Janerio and an increase in the number of plague cases at Guayaquil, Ecuador; the number of cases in the districts of Arequiba and in the vicinity of Trujillo, in Peru, still remains high, but for several years these have been the worst infected districts in that country.

On account of the European war and the alleged presence of German warships on the west coast, the passenger traffic has markedly decreased. The number of cargo ships, however, entering for passage through the canal has increased the number of ships on the Pacific side considerably, the number entering Balboa during the past month being 62.

With reference to immigration: Arrivals from Jamaica and other West Indian ports show marked decrease from previous months. Total apparent decrease for the month of August, 697; for September, 1,228; and for the month of October, 2,038.

During the month of October, covered by this report, no disease of a quarantinable nature arrived at any of our ports.

Detailed statistics are shown in Table XVIII.

DISEASES TREATED.

1. Typhoid fever.....	1
4. Malaria.....	180
6. Measles.....	1
9. Diphtheria and croup.....	2
10. Influenza.....	10
14. Dysentery.....	18
18. Erysipelas.....	1
190. Other epidemic diseases.....	2
20. Purulent infection and septicemia.....	12
26. Pellagra.....	7
27. Beriberi.....	8
28. Tuberculosis of the lungs.....	31
35. Disseminated tuberculosis.....	1
37. Syphilis.....	25
38A. Gonococcus infection.....	26
38B. Soft chancre.....	43
40. Cancer and other malignant tumors of the stomach and liver.....	1
42. Cancer and other malignant tumors of the female genital organs.....	2
43. Cancer and other malignant tumors of the breast.....	2
45. Cancer and other malignant tumors of other organs and of organs not specified.....	1
46. Other tumors (tumors of the female genital organs excepted).....	1
47. Acute articular rheumatism.....	18
54. Anemia, chlorosis.....	2
55. Other general diseases.....	1
56. Alcoholism (acute or chronic).....	11
63. Other diseases of the spinal cord.....	3

64. Cerebral hemorrhage, apoplexy.....	1
68. Other forms of mental alienation.....	3
69. Epilepsy.....	3
70. Convulsions (nonpuerperal) (5 years and over).....	1
73A. Hysteria.....	1
73. Neuralgia and neuritis.....	1
74. Other diseases of the nervous system.....	6
75. Diseases of the eyes and their annexa.....	5
76. Diseases of ears.....	1
78. Acute endocarditis.....	9
79. Organic diseases of the heart.....	14
81. Diseases of the arteries, atheroma, aneurysm, etc.....	1
83. Diseases of the veins (varices, hemorrhoids, phlebitis, etc.).....	3
84. Diseases of the lymphatic system (lymphangitis, etc.).....	5
85. Hemorrhage, other diseases of the circulatory system.....	2
86. Diseases of the nasal fossæ.....	3
87. Diseases of the larynx.....	2
90. Chronic bronchitis.....	28
91. Bronchopneumonia.....	4
92A. Pneumonia (unqualified).....	7
93A. Pleurisy.....	2
96. Asthma.....	1
99. Diseases of the mouth and annexa.....	11
100. Diseases of the pharynx.....	5
103. Other diseases of the stomach (cancer excepted).....	2
104. Diarrhea and enteritis (under 2 years).....	1
105. Diarrhea and enteritis (2 years and over).....	16
108. Ankylostomiasis.....	19
107. Intestinal parasites.....	1
108. Appendicitis and typhlitis.....	5
109. Hernia, intestinal obstructions.....	17
110A. Diseases of the anus.....	28
110B. Other diseases of the intestines.....	5
113. Cirrhosis of the liver.....	2
114. Biliary calculi.....	2
115. Other diseases of the liver.....	4
118. Other diseases of the digestive system (cancer and tuberculosis excepted).....	1
119. Acute nephritis.....	37
120. Bright's disease (chronic nephritis).....	2
124. Diseases of the bladder.....	1
125. Diseases of the urethra, urinary abscess, etc.....	13
126. Diseases of the prostate.....	2
127. Nonvenereal diseases of the male genital organs.....	16
128. Uterine hemorrhage (nonpuerperal).....	1
129. Uterine tumor (noncancerous).....	3
130. Other diseases of the uterus.....	7
130a. Netritis.....	4
131. Cysts and tumors of the ovary.....	1
132. Salpingitis and other diseases of the female genital organs.....	11
133. Nonpuerperal diseases of the breast (cancer excepted).....	1
134A. Normal labor.....	95
134B. Accidents of pregnancy.....	32
137. Puerperal septicæmia.....	2
138. Puerperal albuminuria and convulsions.....	1
143. Furuncle.....	4
144. Acute abscess.....	8
145B. Scabies.....	2
145T. Other diseases of the skin and annexa.....	22
146. Diseases of the bones (tuberculosis excepted).....	4
147. Diseases of the joints (tuberculosis and rheumatism excepted).....	4
150. Congenital malformations (stillbirth not included).....	1
151A. Newborn child.....	84
151B. Congenital debility, icterus, and sclerema.....	2
154. Senility.....	2
165. Other acute poisonings.....	3
167. Burns (conflagration excepted).....	7
170. Traumatism by firearms.....	4
171. Traumatism by cutting or piercing instruments.....	8
175. Traumatism by other crushings (vehicles, railroads, landslides, etc.).....	15
177. Starvation.....	1
185A. Fractures (causes not specified).....	13
189Ba. No disease.....	48
Total.....	1,093

SURGICAL OPERATIONS.

TABLE XVII—SANITATION.

The following is a summary of sanitary work performed and material expended during the month of October, 1914, in the Canal Zone:

Work requests on quartermaster's department:	
Grass cutting.....	11
Screening.....	23
Miscellaneous.....	9
Work requests on engineering department.....	4
Notices served to abate nuisances.....	31
Inspections of closets.....	1,905
Inspections of restaurants.....	3
Inspections of stores.....	38
Inspections of shops.....	61
Garbage cans emptied.....	87,152
Closets disinfected.....	3,175
Houses disinfected.....	1
Rat traps used daily.....	1,864
Adult Anopheles destroyed in houses.....	4,047
Adult Culices destroyed in houses.....	9,500
Larvacide used.....	gallons.. 444
Crude oil used.....	do. 24,417
Rats destroyed.....	793

SUMMARY OF ROUTINE WORK DONE BY THE HEALTH OFFICE, PANAMA.

Mosquito, rat, and fly work:

Linear feet of ditches cleaned and maintained.....	50,601
Linear feet of new ditches dug.....	5,539
Number of cubic yards earth used in filling.....	0
Gallons larvacide used.....	692
Gallons crude oil used.....	160
Square yards pools oiled.....	94,690
Water containers treated.....	38,325
Mosquito-breeding places found.....	547
Fly-breeding places found.....	384
Flies trapped (13,000 per quart).....	quarts.. 218
Rats trapped.....	608

Garbage collections:

Number of loads garbage removed to dump.....	4,766
Total number of cans garbage emptied.....	107,590

Buildings:

Work for month of October—

Number of buildings inspected.....	5,206
Number of plans for new buildings approved.....	23
Number of permits granted for repairs to old buildings.....	90
Total number of permits granted.....	113
Number of buildings condemned.....	61
Number of buildings demolished.....	30

Work since Apr. 1—

Total number of buildings condemned.....	898
Total number of buildings demolished.....	186
Number of permits for new buildings.....	213
Number of permits for repairs to old buildings.....	821
Total number of permits issued.....	1,034
Permits for new buildings completed.....	150
Permits for repairs to old buildings completed.....	579
Total number of permits completed.....	729
Total number of permits completed, 729, or 70.50 per cent.	
Total number of permits outstanding, 305, or 29.50 per cent.	

Street cleaning:

Average number of square yards cleaned daily.....	600,000
Average number of square yards streets sprinkled.....	90,000
Number of private properties cleaned during month.....	5
Number of notices served and nuisances abated.....	62

Vaccinations:

Number of vaccinations during month.....	1,444
Total number of vaccinations since Apr. 1, 1914.....	10,923

GENERAL WORK REPORT FOR COLON, CRISTOBAL, AND MOUNT HOPE.

General sanitation, Colon:

Square yards street cleaned.....	4,207,704
Square yards alleys maintained.....	728,865
Loads of yard garbage.....	488
Private properties cleaned.....	88
Number of rats killed.....	150
Doses of quinine issued.....	9,391
Number of cans garbage (2,196 cubic yards).....	67,546
Linear yards ditches constructed (37 cubic yards).....	83
Linear yards ditches maintained.....	3,302
Number of cubic feet fumigated (4 buildings).....	74,610
Square yards vegetation removed.....	41,026

Parkway and E Street maintained.

Square yards oiled.....	25,960
Number of receptacles treated.....	30,300
Number of mosquito-breeding places destroyed.....	106
Number of fly-breeding places destroyed.....	49
Number of buildings inspected.....	3,960
Gallons larvacide used.....	160
Gallons crude oil used.....	400
Live rats caught.....	11

Building, Colon:

Number of plans approved.....	3
Number of permits to occupy issued.....	4
Number of permits to repair issued.....	70
Number of temporary permits to occupy issued.....	1

Sewers, Colon:

Number of new connections made during month.....	4
Total number of connections made to date.....	1,163
Number of houses in which extensions were made.....	4
Number of outstanding permits.....	32

Sanitation, Cristobal:

Square yards pools oiled.....	5,450
Number of receptacles treated.....	3,000
Number of mosquito-breeding places destroyed.....	13
Number of fly-breeding places destroyed.....	1
Number of buildings inspected.....	180
Gallons larvacide used.....	25
Gallons crude oil used.....	112

From Oct. 19 to 31 (taken over from quartermaster's department),
Cristobal—

Loads of yard garbage.....	45
Number of cans garbage (234 cubic yards).....	5,685
Square yards vegetation removed.....	13,520

Sanitation, Mount Hope:

Square yards pools oiled.....	184,450
Number receptacles treated.....	14,650
Number of mosquito-breeding places destroyed.....	70
Number of rats killed.....	4
Linear yards ditches constructed (140 cubic yards).....	1,418
Linear yards ditches maintained.....	18,948
Number of mosquitoes killed in barracks (Anopheles).....	156
Number of mosquitoes killed in barracks (Culices).....	7,754
Number of mosquitoes killed in cars (Anopheles).....	846
Number of mosquitoes killed in cars (Culices).....	361
Gallons larvacide used.....	249
Gallons crude oil used.....	3,415

Mount Hope Cemetery maintained.

Number of burials made.....	54
-----------------------------	----

From Oct. 19 to 31 (taken over from quartermaster's department),
Mount Hope—

Number of cans garbage (109½ cubic yards).....	1,375
Square yards vegetation removed.....	69,109

TABLE XVIII.—QUARANTINE TRANSACTIONS.

PORTS OF BALBOA AND PANAMA.

Number of vessels inspected and passed.....	57
Number of vessels inspected and held in quarantine.....	5
Total number of vessels inspected.....	62
Number of vessels fumigated on arrival.....	5
Number of vessels fumigated on departure.....	0
Total number of vessels fumigated.....	5
Number of crew examined.....	2,985
Number of passengers from foreign ports examined and landed:	
Cabin.....	274
Steerage.....	160
	434
Total number of persons examined.....	3,419
Number of persons vaccinated at ports of arrival because of compulsory vaccination law.....	3
Number of persons vaccinated at ports of departure or en route because of compulsory vaccination law.....	26
Total number of persons vaccinated.....	29
Number of persons held in quarantine at the detention house to complete period of incubation for fever or plague.....	36
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever or plague.....	705
Total number of persons held under observation.....	741

Number of persons embarked for foreign ports:		
Cabin.....	559	
Steorage.....	103	
		662
Number of persons arriving from coast towns in small launches and sailing craft.....		1,383
Number of persons sailing for coast towns in small launches and sailing craft.....		1,446
Number of bills of health issued.....		42
Total number of persons landed.....	1,817	
Total number of persons sailing.....	2,108	
Apparent decrease for the month.....		291

PORTS OF COLON AND CRISTOBAL.

Number of vessels inspected and passed.....	112	
Number of vessels held in quarantine.....	2	
Total number of vessels inspected.....		114
Number of vessels fumigated on arrival.....		1

Number of persons vaccinated in port of arrival.....	316	
Number of persons vaccinated in ports of departure or en route.....	249	
Total number of persons vaccinated.....		565
Number of persons detained in quarantine to complete period of incubation for yellow fever and plague.....	199	
Number of persons detained on vessels.....	244	
Total number of persons held under observation.....		443
Total number of persons landed from foreign ports:		
Cabin.....	1,338	
Steorage.....	525	
		1,863
Total number of persons embarked for foreign ports:		
Cabin.....	1,286	
Steorage.....	2,329	
		3,625
Number of persons in transit.....		607
Number of persons from coast towns inspected.....		274
Number of persons from coast towns not inspected.....		244
Number of persons leaving Colon for coast towns.....		216
Number of persons landed during month:		
For immigration report.....	2,094	
For Pacific ports.....	287	
		2,381
Number of bills of health issued.....		13
Number of bills of health void.....		99
Number of persons recommended for deportation.....		12
Total number of persons landed.....	2,381	
Less number for Pacific ports.....	287	
		2,094
Total number of persons sailing.....		3,841
Apparent decrease for month.....		1,747

CONSOLIDATED REPORT—PORTS OF BALBOA-PANAMA AND COLON-CRISTOBAL.

Number of vessels inspected and passed.....	169	
Number of vessels held in quarantine.....	7	
Total number of vessels entered.....		176
Number of vessels fumigated on arrival.....	6	
Number of vessels fumigated on departure.....	5	
Total number of vessels fumigated.....		11

Number of crew examined.....	9,691	
Number of passengers examined.....	3,178	
Total number of persons examined.....		12,869
Number of persons vaccinated at ports of arrival because of compulsory vaccination law.....	319	
Number of persons vaccinated at ports of departure or en route because of compulsory vaccination law.....	275	
Total number of persons vaccinated.....		594
Number of persons held in quarantine at the detention houses to complete period of incubation of yellow fever and plague.....	235	
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever and plague.....	949	
Total number of persons held under observation.....		1,184
Total number of persons landed from foreign ports:		
Cabin.....	1,612	
Steerage.....	685	
		2,297
Total number of persons embarked for foreign ports:		
Cabin.....	1,855	
Steerage.....	2,432	
		4,287
Total number of persons arriving from coast towns on small launches and sailing craft.....	1,901	
Total number of persons sailing for coast towns on small launches and sailing craft.....	1,662	
Apparent increase for month from coast towns.....		239
Apparent decrease for month from foreign ports:		
Cabin (decrease).....	243	
Steerage (decrease).....	1,747	
		1,990
Number of immigrants recommended for deportation.....		12
Number of bills of health issued or viséed.....		154
Total number of persons landed.....	4,198	
Less number for Pacific ports.....	287	
		3,911
Total number of persons sailing.....		5,949
Total apparent decrease for month.....		2,038
